

Jungle Safari

It is an incredible effort to promote eco tourism and build an understanding of the natural elements of a place. It promotes protection of ecosystem and responsible eco tourism. As an element developed in the context of Statue of Unity, Jungle Safari has received immense praise.

2ND EDITION

About

The development of the Statue of Unity has unfolded various sides of environment. The Jungle Safari is an extraordinary effort to promote eco tourism in a place. Jungle safari near the Statue of Unity is one of the most enthralling experiences for the nature and wild life lover. The safari was inaugurated by Hon'able Prime Minister of India, Mr. Narendra Modi on 30th October, 2020. The safari extends at an area of 375 acres where various indigenous and exotic fauna from different bio-geographic regions of the world are seen. The zoo is built up in the parts of Vindhya hill, so while enjoying the diversity of the zoo the physiographic characteristics of the area will also enhance the enjoyment of the trip.

Details

A jungle safari makes people attach to the environment and natural habitat. It helps the tourists to understand and respect the flora and fauna of the surroundings. The safari extends from an elevation of 29 metres to 180 metres. More than 186 species from biomes of Australia, Africa, Asia and America can be found here. Various endangered species of India like Royal Bengal tiger, Asiatic Lion, leopard etc. are there in the zoo.

This adventure journey involves watching the animals in the open environment, tour in the jungle, walk through Aviary etc. The aviary is one of the largest geodesic domes in India. The detailing in the landscaping has made the safari even more beautiful and adventurous.

The Jungle Safari provides immense knowledge regarding ecosystem as well as different biomes of earth. It has hosted **186 species** of fauna from all over the world. **149 types of birds** were hosted in the park. Bird watching of Red Jungle Fowl, Partridge, parrots, pelican through Fly High Aviary; experiencing exotic birds like Pheasants, Macaw, Black Swan, Grey parrot etc. and seeing wild animals like tiger, leopard adjusting with environment shows the diversity of the environment. Herbivores like Spotted Deer, Black bucks, Sambar deer, Blue Bulls etc. and natural preservation of species like Giraffe, Zebra, Ostrich etc. from different parts of the world are highlights of this place.
