

It's time for wetland restoration

- **Wetlands are vital for humanity...**
- **Freshwater is rare. Wetlands provide most of it.**
- **Wetlands store more carbon than forests.**
- **Wetlands help us cope with storms and flooding.**
- **Wetlands give livelihoods to one billion and feed 3.5 billion.**

Wetland restoration is urgent. What are the best ways to approach it?

Follow seven best practices

1. Restore multiple benefits
2. Involve the community
3. Create a self-sustaining wetland
4. Structure access to the wetland
5. Limit the causes of degradation
6. Clean up the degraded area
7. Restore native flora and fauna
